

# Braille Services

## Mission & Value Proposition

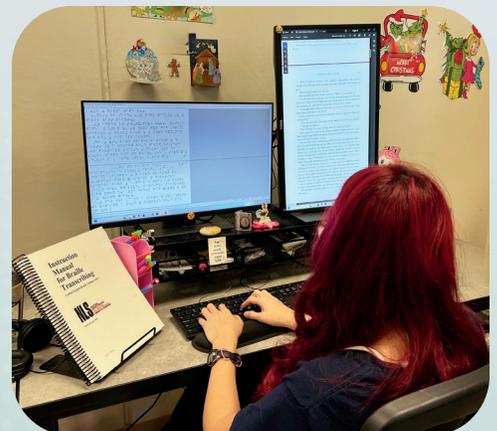

At the OCE Braille Program, we produce high-quality braille materials that empower blind and low-vision individuals through accessibility and inclusion. Our mission is to break barriers and create opportunities, advancing accessibility while opening pathways to meaningful careers. By combining technical expertise with rehabilitation, we deliver certified braille transcription services that help further education for the visually impaired community, foster inclusion, and strengthen communities by reducing barriers to reentry.

## Challenges for the Visually Impaired Community

- Limited Educational Access – Textbooks and resources often lack braille, creating barriers.
- Employment Barriers – Inaccessible training and workplace documents limit opportunities.
- Information Inequality – Everyday materials rarely in braille, reducing independence.
- Reduced Community Participation – Lack of accessible information limits social and civic engagement.
